

LOLLIPOP TREES

-COLORING FOR GROWN UPS-

*Enrichment
Studies*

If there's one thing I know that children love, it's when we *enter in* with them.

Instead of telling them, "Go play," they love it when we join them in their play.

Instead of suggestion they get out a board game, they are delighted if mommy will be the banker or help them play as they learn the rules.

Lego building is more exciting with a beloved parent to share it with (and teach!).

For Enrichment Studies families, listening to beautiful music can be a favorite activity, and I've found in my own experience that one of the best things to do while listening to music is to do a little art. Whether you get out blank pieces of paper and let your crayons flow to the rhythm of the music, or if you do a more specific type of art, it can help us slow down, relax, and give us time to experience the music apart from the normal rush of our busy lives.

My hope is that this collection of Lollipop Trees coloring pages will help you slow down and enter in to some creative time, either by yourself or with your children. Play some of our streaming music options that come with your composer studies, or anything of your choosing. You'll quickly see how enjoyable it is to take time for this!

Enter in!
